Good afternoon,

After talking to OPS, they told me that most of the fences that were requested to removed (by OPS) are almost completely removed

You can see yesterday's OPS request and can be situate with the current status.

Please see the below request from our contact Sam from OPS (cc'd).

- * Fencing from the Parliament building to the Langevin building must be kept → any fencing to the east of this can be removed.
- * Fencing from Kent to the Parliament building must be kept → any fencing to the west of this can be removed.
- * Any fencing on Sparks can be removed.

Regards,

Eric Graham

1. Are you aware of any fencing located between the Langevin building and Parliament Hill. If there is no fencing present, would we be required to install some. Additionally would this fencing need to accommodate pedestrian ingress/egress?
   - * If there is no fence there, yes, one will need to be set up there. It would be on the West side of Elgin at Wellington. There will need to be access for large vehicles but no pedestrian access.
2. What is the time frame you had in mind. Are we free to remove the fencing that is no longer required ASAP or is this a request that can be fulfilled this weekend?
   - * Could we please begin this work tomorrow, post snow event and clean up. This will ensure the safety of the workers. The city is also setting up lane tapers and appropriate closures to ensure the traffic flow but mostly for the safety of the members removing the fence.

Sam
